Data Source: Behavioral Risk Factor Surveillance System

Data is based on the number of adults with diabetes who reported that they had an eye exam in which the pupils were dilated within the past year.

% = Weighted percentage of respondents

LCL= Lower 95% confidence level of the weighted percentage; UCL= Upper 95% confidence level of the weighted percentage

All percentages are weighted to be more representative of the population of Maine and to adjust for non-response.

DNR = data not reliable. Data is suppressed if the confidence interval is greater than 20 percentage points.
